DIBBS SUPPLIER INFORMATION SHEET

Hydraulics. Pneumatics. Motion control.

Serving customers since 1965, Wilson Company supplies fluid-power components and develops custom hydraulic, pneumatic, and electrical-control solutions. Technical support spans component selection, system design, fabrication, and assembly.

01 CORE PRODUCTS & CAPABILITIES

Hydraulic components: Pumps, motors, valves, power units, and filtration.
Pneumatic components: Cylinders, valves, actuators, and automation products.
Fluid connections: Hose, fittings, tubing, clamps, and couplings.
Custom solutions: Manifold assemblies, electrical controls, filter carts, kitting, and hydraulic/pneumatic assemblies.

02 TECHNICAL & SERVICE SUPPORT

Application and technical specialists support system design, manifold design, and machine controls. Services include fabrication, hose assembly, system testing, equipment repair, installation, maintenance planning, and hydraulic/pneumatic training.

03 DISTRIBUTION

Wilson Company distributes hydraulic and pneumatic components from Parker Hannifin, our primary original equipment manufacturer (OEM) partner. Our distribution capabilities combine access to Parker products with technical expertise to support component selection, replacement parts, and system requirements.
