STAUFF products and services are globally available through wholly-owned subsidiaries and a tight network of authorised distributors and representatives in all major industrial regions of the world.

You can find detailed contact information on the last two pages of this product catalogue or at www.stauff.com.

Please note: Unless otherwise stated, all data and figures in this product catalogue are approximate values and are only valid as references, which are not binding (also in respect to any third parties' rights of protection) and thus do not release the customer / user from checking and testing the suitability of the products for the foreseen purposes. Therefore, data and figures can only be used in a limited sense for construction purposes.

The application of the products is beyond the control possibilities of the manufacturer and, therefore, is exclusively subject to the responsibility of the customer / user.

In the event that a liability is nevertheless considered, any compensation will be limited to the value of the goods supplied by the manufacturer and used by the customer / user. As a matter of course, the manufacturer guarantees the perfect quality of all products in accordance with the General Terms and Conditions of Business and Sale.

Subject to modifications due to the ongoing development and improvement of the products.

With the publication of this product catalogue, previous editions are no longer valid.

For more than 50 years, the companies of STAUFF Group have been developing, manufacturing and distributing pipework equipment and hydraulic components for mechanical and plant engineering and for service and industrial maintenance.

In addition to mobile and industrial hydraulic machinery, typical applications also include commercial and special purpose vehicles, rail transportation and energy technology. Likewise, STAUFF products are used in marine, oil and gas applications and in the process, food and chemical industries.

The overall range currently includes about 40000 standard products as well as numerous special and system solutions according to customer's specifications or based on our in-house development.

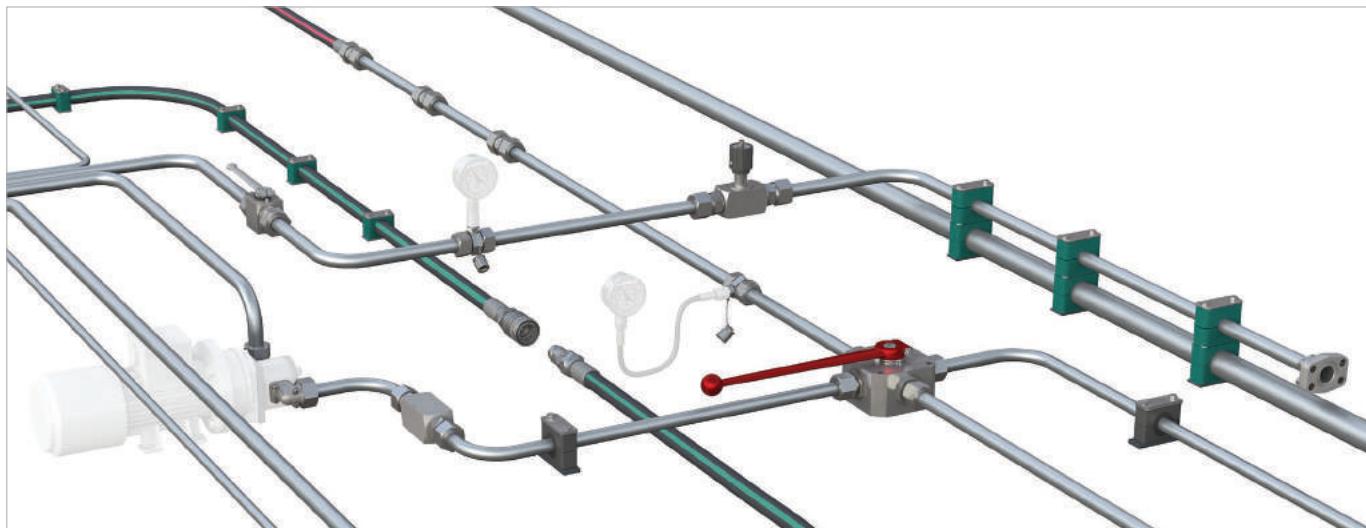

All STAUFF products undergo relevant testing in accordance with international regulations and are governed by the high standards of the in-house quality management system. Furthermore, many items have received certifications and approvals from various international institutes, organisations and authorities who have independently confirmed the quality and performance of the products.

Wholly-owned manufacturing, sales and service facilities in 18 countries and a tight global network of authorised distribution partner ensure high presence and service paired with a maximum of availability.

STAUFF LINE Components

With the seven dedicated **STAUFF Line** product groups

- STAUFF Clamps
- STAUFF Connect
- STAUFF Flanges
- VOSWINKEL Hose Connectors
- VOSWINKEL Quick Release Couplings
- STAUFF Valves
- STAUFF Test

from own, in-house development and manufacturing, the companies of the STAUFF Group provide a comprehensive range of components for fastening and connecting pipes, tubes and hoses for mobile and industrial hydraulic applications and many other industries.

The portfolio is completed by components for shutting-off, regulating, throttling and measuring fluid media.

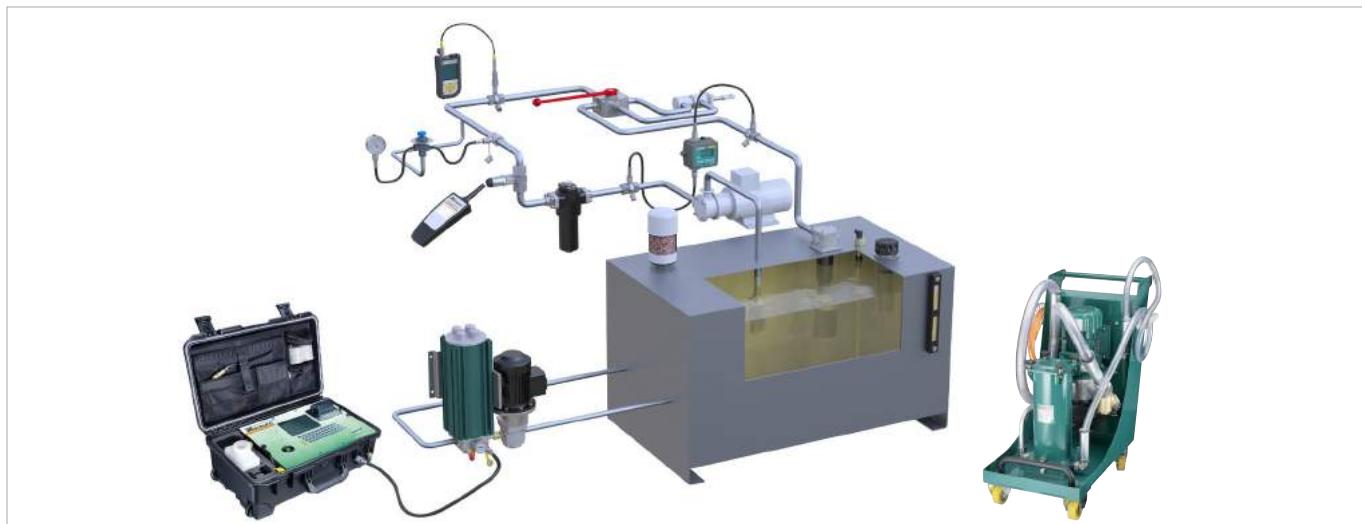

In order to perfectly match each other, STAUFF Line products are designed and offered on a high, uniform level of quality. A large proportion of the range made from steel comes as standard with the premium STAUFF Zinc/Nickel surface coating, which is also optionally available for many of the other components.

This coating offers the most reliable surface protection far beyond the previous market standards – even after transport, handling and assembly of the components – and meets all current legal requirements.

If desired, Original Equipment Manufacturers can be supported with value-added services, from **technical consultation** to **pre-assembly, assembly and kitting** as well as **logistics services**:

- Support with the **selection of suitable standard components** and ordering options; provision of **customised solutions** according to customer's specifications or based on our in-house development – from prototyping to large scale production
- **Analysis and optimization** of existing and design and developments of new systems aimed at increasing the efficiency and performance of machines and equipment and creating value for customers by reducing the total cost
- **Pre-assembly, assembly and kitting** of individual components to customer-specific system modules
- Individually coordinated **procurement solutions** (e.g. web shop and electronic data interchange) and **supply models** (e.g. from warehousing of customised components to Kanban logistics and just-in-time delivery of pre-fabricated system modules to the assembly lines of the customers) aimed at optimising material flows

Aligned with the needs of the market, the product groups

- STAUFF Test
- STAUFF Diagtronics
- STAUFF Filtration Technology
- STAUFF Hydraulic Accessories

include a comprehensive range of analogue and digital measuring equipment and devices, filtration systems and replacement filter elements as well as accessories for the construction of tanks, reservoirs, power packs and gear boxes in mobile and industrial hydraulics.

The offer is completed by relevant value-added services:

- Support with the **selection of suitable components** and ordering options; provision of **customised solutions** according to customer's specifications or based on our in-house development – from prototyping to large scale production
- Analysis of existing hydraulic circuits aimed at filtration systems, tank components and monitoring devices that perfectly match to the specific requirements, and developing integrated concepts to increase the efficiency and performance of machines and equipment
- Individually coordinated **procurement solutions** and **supply models**

STAUFF Flanges

The STAUFF Flanges product group is closely aligned with the market requirements and contains an extensive range of single-part and multi-part SAE flange connectors in the standard and high pressure series according to SAE J 518 C and ISO 6162-1/2.

The standard-Pressure Series (3000 PSI) contains flange components with maximum operating pressures between 35 bar and 350 bar or 508 PSI and 5075 PSI and is available for a variety of nominal sizes between DN 13 (1/2") and DN 127 (5").

The 6.000 PSI High-Pressure Series is suitable for maximum operating pressures up to 400 bar or 6090 PSI and covers nominal sizes between DN 13 (1/2") and DN 76 (3").

STAUFF SAE Flanges are used as a reliable alternative in applications where the use of regular tube fittings is not permitted or technically not possible due to the required operating pressure, the size or the limited mounting space.

Compared to tube fittings, the biggest advantage of SAE Flanges is the considerably higher pressure resistance for most sizes and the continuous pressure level in the High-Pressure Series (6000 PSI).

The STAUFF Flanges product group is completed by various types and designs of gear pump flanges made from carbon steel and aluminium in accordance with German and Italian connection standards.

www.stauff.com/catalogues

The STAUFF online catalogue centre at www.stauff.com/catalogues provides fast and direct access to digital versions of this as well as other STAUFF product catalogues in all available languages.

Online Page-Flip Catalogues

- Easy navigation through index or the powerful full text search functionality
- Contents can be shared and forwarded by e-mail, printed or downloaded and saved in PDF file format

¹ The maximum working pressure PN (bar/PSI) applies only to the flange itself and depends on the bolts used (Grade 8.8 / 10.9). The actual maximum working pressure depends on the thickness and the quality of the tube used.

² Dimensions of screw holes in part different to the ISO to match both Metric and UNC bolts.

¹ The maximum working pressure PN (bar/PSI) applies only to the flange itself and depends on the bolts used (Grade 8.8 / 10.9). The actual maximum working pressure depends on the thickness and the quality of the tube used.

² Dimensions of screw holes in part different to the ISO to match both Metric and UNC bolts.

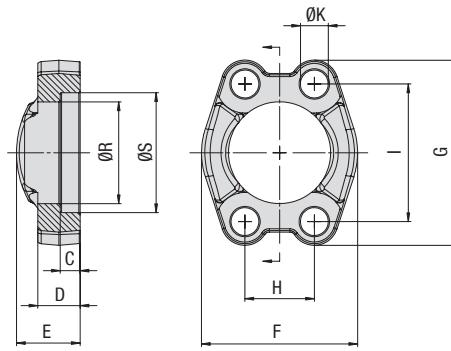

Materials / Ordering Options / Examples

* Flange Clamp (Flat Style) made of Steel C55 or equivalent, zinc-plated and thick-film-passivated

BM-FL-...-W66

* Kit including Metric bolts 8.8, spring rings, O-ring made of NBR (Buna-N®)
* Kit including Metric bolts 8.8, spring rings, O-ring made of FKM/FPM (Viton®)

BM-FL-...-M-B-W66-K

BM-FL-...-M-V-W66-K

* Kit including Metric bolts 10.9, spring rings, O-ring made of NBR (Buna-N®)
* Kit including UNC bolts (Grade 8), spring rings, O-ring made of NBR (Buna-N®)

¹ The maximum working pressure PN (bar/PSI) applies only to the flange itself and depends on the bolts used (Grade 8.8 / 10.9). The actual maximum working pressure depends on the thickness and the quality of the tube used.

² According to ISO 6162-2 bolts M12 should be used but because usually bolts M14 are used the description of the complete part must show M14 (e.g. CAG-604-ST-**/**-M14#K).

Materials / Ordering Options / Examples

¹ The maximum working pressure PN (bar/PSI) applies only to the flange itself and depends on the bolts used (Grade 8.8 / 10.9). The actual maximum working pressure depends on the thickness and the quality of the tube used.

² According to ISO 6162-2 bolts M12 should be used but because usually bolts M14 are used the description of the complete part must show M14 (e.g. CAG-604-T-***/**-M14#K).

Materials / Ordering Options / Examples

- * SAE Flange Adaptor (without O-ring) made of Steel S355J0 or equivalent, zinc-plated and thick-film-passivated CAG-...-T-W66
- * SAE Counterflange Adaptor made of Steel S355J0 or equivalent, zinc-plated and thick-film-passivated CSG-...-T-W66
- * SAE Flange Adaptor (without O-ring) made of Stainless Steel V4A – 1.4571 (on request) CAG-...-T-W5
- * Size of connection thread deviating from the standard (e.g. 1/2 BSPT) CAG-...-T08-W66
- * Kit with DB including Metric bolts 8.8, spring rings, O-ring made of NBR (Buna-N®) CAG-...-T-W66-K
- * Kit with DB including Metric bolts 8.8, spring rings, O-ring made of FKM/FPM (Viton®) CAG-...-T-V-W66-K
- * Kit with DB including Metric bolts 10.9, spring rings, O-ring made of NBR (Buna-N®) CAG-...-T-MH-W130-K
- * Kit with DB including UNC bolts (Grade 8), spring rings, O-ring made of NBR (Buna-N®) CAG-...-T-U-W130-K

¹ The maximum working pressure PN (bar/PSI) applies only to the flange itself and depends on the bolts used (Grade 8.8 / 10.9). The actual maximum working pressure depends on the thickness and the quality of the tube used.

² According to ISO 6162-2 bolts M12 should be used but because usually bolts M14 are used the description of the complete part must show M14 (e.g. CAG-604-S30-M14#K).

¹ The maximum working pressure PN (bar/PSI) applies only to the flange itself and depends on the bolts used (Grade 8.8 / 10.9). The actual maximum working pressure depends on the thickness and the quality of the tube used.

² For UNC threaded bolts, use hexagon head bolts only. Please note that these do not belong to our product range.

Materials / Ordering Options / Examples

- * SAE Single-Part Flange (without O-ring) made of Steel S355J0 or equivalent, blank (oiled)
- * SAE Single-Part Flange (without O-ring) made of Stainless Steel V4A – 1.4404 (on request)

 BFX-...-N-W1
BFX-...-N-W5

- * Size of connection thread deviating from the standard (e.g. 1-1/4 NPT)

BFX-...-N20-W1

- * Kit including Metric bolts 8.8, spring rings, O-ring made of NBR (Buna-N®)
- * Kit including Metric bolts 8.8, spring rings, O-ring made of FKM/FPM (Viton®)
- * Kit including Metric bolts 10.9, spring rings, O-ring made of NBR (Buna-N®)
- * Kit including UNC bolts (Grade 8), spring rings, O-ring made of NBR (Buna-N®)

 BFX-...-N-W46-K
BFX-...-N-V-W46-K
BFX-...-N-MH-W1-K

Materials / Ordering Options / Examples

- * SAE Single-Part Flange (without O-ring) made of Steel S355J0 or equivalent, blank (oiled)
- * SAE Single-Part Flange (without O-ring) made of Stainless Steel V4A – 1.4404 (on request)
- * Kit including Metric bolts 8.8, spring rings, O-ring made of NBR (Buna-N®)
- * Kit including Metric bolts 8.8, spring rings, O-ring made of FKM/FPM (Viton®)
- * Kit including Metric bolts 10.9, spring rings, O-ring made of NBR (Buna-N®)
- * Kit including UNC bolts (Grade 8), spring rings, O-ring made of NBR (Buna-N®)

- BFX-...-U**-W1
- BFX-...-U**-W5
- BFX-...-U**-W46-K
- BFX-...-U**-V-W46-K
- BFX-...-U**-MH-W1-K
- BFX-...-U**-U-W1-K

Please always indicate Thread Size.

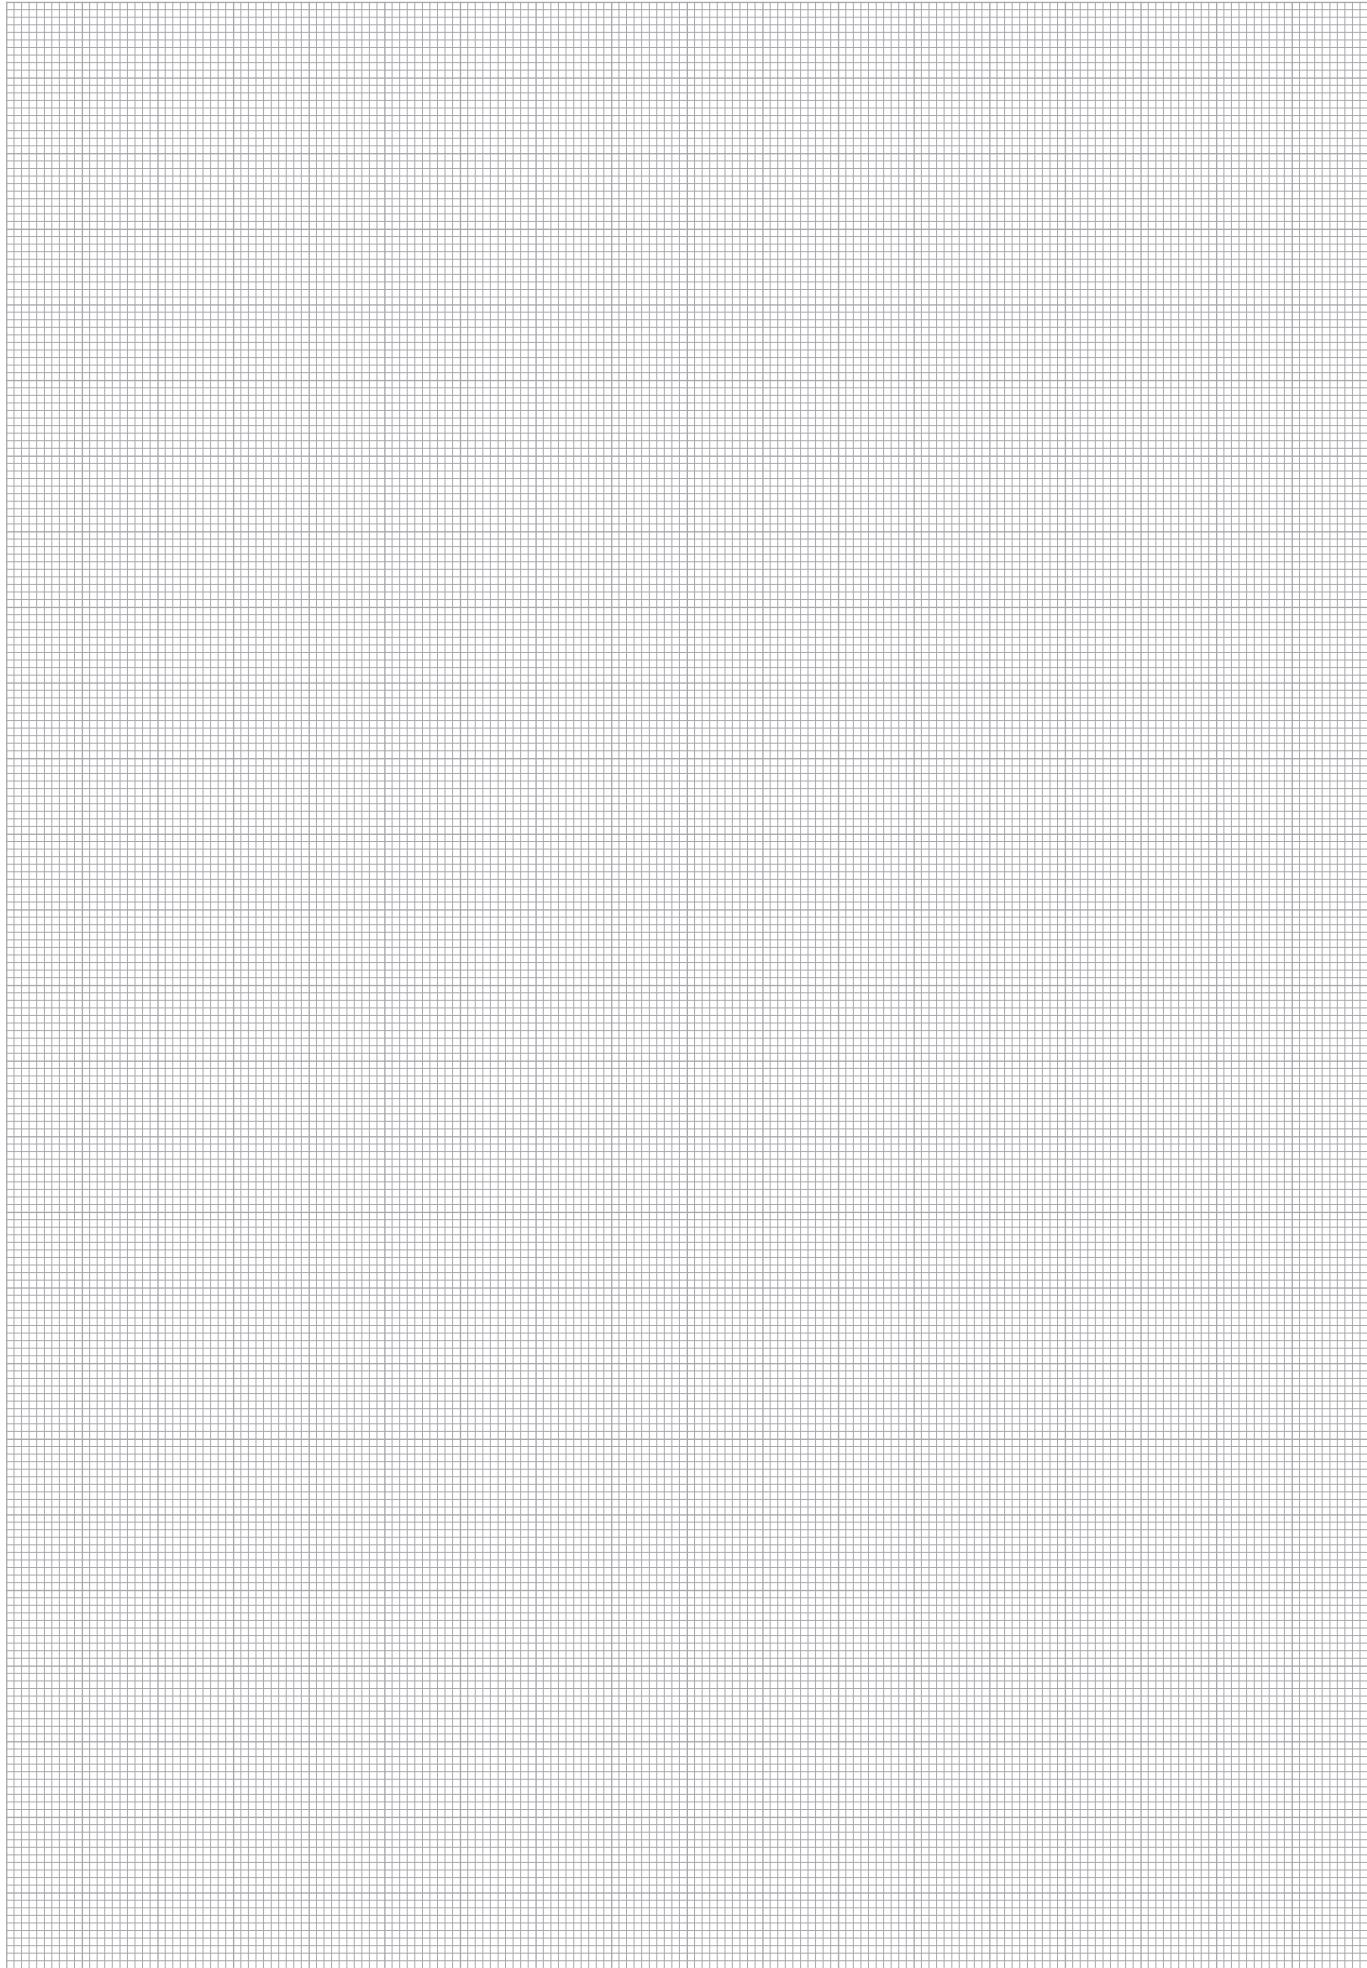

¹ The maximum working pressure PN (bar/PSI) applies only to the flange itself and depends on the bolts used (Grade 8.8 / 10.9). The actual maximum working pressure depends on the thickness and the quality of the tube used.

² For UNC threaded bolts, use hexagon head bolts only.

Please note that these do not belong to our product range.

³ Alternative options shown in brackets are available on request.

¹ The maximum working pressure PN (bar/PSI) applies only to the flange itself and depends on the bolts used (Grade 8.8 / 10.9). The actual maximum working pressure depends on the thickness and the quality of the tube used.

² For UNC threaded bolts, use hexagon head bolts only. Please note that these do not belong to our product range.

Materials / Ordering Options / Examples

* SAE Single-Part Flange (without O-ring) made of Steel S355J0 or equivalent, blank (oiled)

¹ The maximum working pressure PN (bar/PSI) applies only to the flange itself and depends on the bolts used (Grade 8.8 / 10.9). The actual maximum working pressure depends on the thickness and the quality of the tube used.

² For UNC threaded bolts, use hexagon head bolts only. Please note that these do not belong to our product range.

Materials / Ordering Options / Examples

* SAE Single-Part Flange (without O-ring) made of Steel S355J0 or equivalent, blank (oiled)

* SAE Single-Part Flange (without O-ring) made of Stainless Steel V4A – 1.4404 (on request)

BFX-...-SRE-**/**-W1

BFX-...-SRE-**/**-W5

* Kit including Metric bolts 8.8, spring rings, O-ring made of NBR (Buna-N®)

* Kit including Metric bolts 8.8, spring rings, O-ring made of FKM/FPM (Viton®)

* Kit including Metric bolts 10.9, spring rings, O-ring made of NBR (Buna-N®)

* Kit including UNC bolts (Grade 8), spring rings, O-ring made of NBR (Buna-N®)

Please always indicate ØB / ØA.

¹ The maximum working pressure PN (bar/PSI) applies only to the flange itself and depends on the bolts used (Grade 8.8 / 10.9). The actual maximum working pressure depends on the thickness and the quality of the tube used.

³ Alternative options shown in brackets are available on request.

Materials / Ordering Options / Examples

* SAE Single-Part Flange (without O-ring) made of Steel S355J0 or equivalent, blank (oiled)

* SAE Single-Part Flange (without O-ring) made of Stainless Steel V4A – 1.4404 (on request)

* Size of connection thread deviating from the standard (e.g. 3/8 NPT)

* Kit including Metric bolts 8.8, spring rings, O-ring made of NBR (Buna-N®)

* Kit including Metric bolts 8.8, spring rings, O-ring made of FKM/PFM (Viton®)

* Kit including Metric bolts 10.9, spring rings, O-ring made of NBR (Buna-N®)

* Kit including UNC bolts (Grade 8), spring rings, O-ring made of NBR (Buna-N®)

¹ The maximum working pressure PN (bar/PSI) applies only to the flange itself and depends on the bolts used (Grade 8.8 / 10.9). The actual maximum working pressure depends on the thickness and the quality of the tube used.

² For UNC threaded bolts, use hexagon head bolts only. Please note that these do not belong to our product range.

³ Alternative options shown in brackets are available on request.

- ¹ The maximum working pressure PN (bar/PSI) applies only to the flange itself and depends on the bolts used (Grade 8.8 / 10.9). The actual maximum working pressure depends on the thickness and the quality of the tube used.
- ² For UNC threaded bolts, use hexagon head bolts only. Please note that these do not belong to our product range.

Materials / Ordering Options / Examples

- * SAE Single-Part Flange (without O-ring) made of Steel S355J0 or equivalent, blank (oiled)
- * SAE Single-Part Flange (without O-ring) made of Stainless Steel V4A – 1.4404 (on request)
- * Kit including Metric bolts 8.8, spring rings, O-ring made of NBR (Buna-N®)
- * Kit including Metric bolts 8.8, spring rings, O-ring made of FKM/FPM (Viton®)
- * Kit including Metric bolts 10.9, spring rings, O-ring made of NBR (Buna-N®)
- * Kit including UNC bolts (Grade 8), spring rings, O-ring made of NBR (Buna-N®)

BFX-...-CP-U-W1-K

¹ The maximum working pressure PN (bar/PSI) applies only to the flange itself and depends on the bolts used (Grade 8.8 / 10.9). The actual maximum working pressure depends on the thickness and the quality of the tube used.

² For UNC threaded bolts, use hexagon head bolts only. Please note that these do not belong to our product range.

³ Alternative options shown in brackets are available on request.

² According to ISO 6162-2 bolts M12 should be used but because usually bolts M14 are used the description of the complete part must show M14 (e.g. CAG-BP-604-M14-W66-K).

Materials / Ordering Options / Examples

- * SAE Blindplug (without O-ring) made of Steel S355J0 / C45 or equivalent, zinc-plated and thick-film-passivated **CAG-BP-...-W66**
- * SAE Blindplug (without O-ring) made of Stainless Steel V4A – 1.4404 (on request) **CAG-BP-...-W5**
- * SAE Counterflange Blindplug made of Steel S355J0 / C45 or equivalent, zinc-plated and thick-film-passivated **CSG-BP-...-W66**
- * Kit with DB including Metric bolts 8.8, spring rings, O-ring made of NBR (Buna-N®) **CAG-BP-...-W66-K**
- * Kit with DB including Metric bolts 8.8, spring rings, O-ring made of FKM/FPM (Viton®) **CAG-BP-...-V-W66-K**
- * Kit with DB including Metric bolts 10.9, spring rings, O-ring made of NBR (Buna-N®) **CAG-BP-...-MH-W130-K**
- * Kit with DB including UNC bolts (Grade 8), spring rings, O-ring made of NBR (Buna-N®) **CAG-BP-...-U-W130-K**
- * Kit with BM including Metric bolts 8.8, spring rings, O-ring made of NBR (Buna-N®) **CAG-BP-...-BM-W66-K**

Separate Bolt Sets and Sealings

Bolt Sets

Ordering of bolt sets (consisting of 4 hexagon socket head cap bolts and 4 spring rings) by using the ordering codes as stated below:

Metric bolts (property class 8.8)	KIT-BFX-IS-M12x50-ISO4762-8.8-W66	(Steel, zinc-plated and thick-film-passivated)
Metric bolts (property class 10.9)	KIT-BFX-IS-M12x50-ISO4762-10.9-W1	(Steel, blank and oiled)
UNC bolts (Grade 8)	KIT-BFX-IS-U5/16-18X1-1/4-AB18.3-GR8-W1	(Steel, blank and oiled)

Thread diameters, dimensions (see corresponding catalogue pages) and property classes / grades have to be chosen to meet your specific requirements.
Replace material code W66 / W1 with W5 for bolts made of Stainless Steel V4A – 1.4571.

Metric bolts ISO 4762	Spring rings for Metric bolts DIN 7980
UNC bolts ANSI B 18.3	Spring rings for UNC bolts ANSI B 18.21.1

Sealings**3000 PSI Standard Pressure Series (according to ISO 6162-1)**

Tightening Torques	115
Sizing Guide for SAE Flanges	116

G

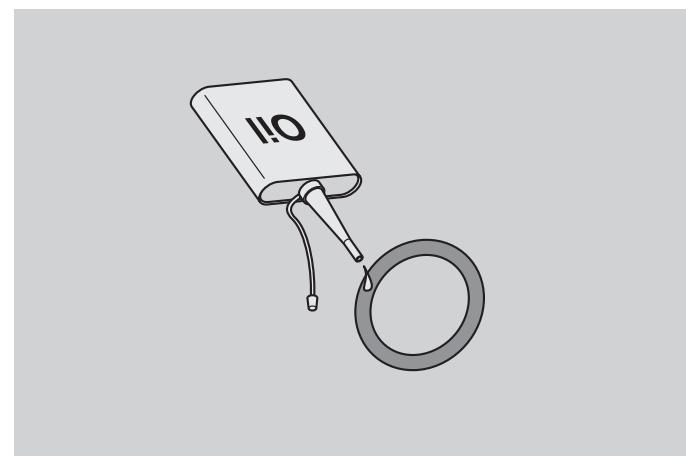

Assembly Instructions for SAE Flanges

Check the sealing surface and the o-ring groove of the flange for visible damage (scratches, cracks, notches, sharp edges or burrs) and make sure that both are free of contamination and any foreign particles. Circular machining marks up to a surface roughness of Ra max 3,2 (ISO 1302) are acceptable and do not influence the performance of the flange connection.

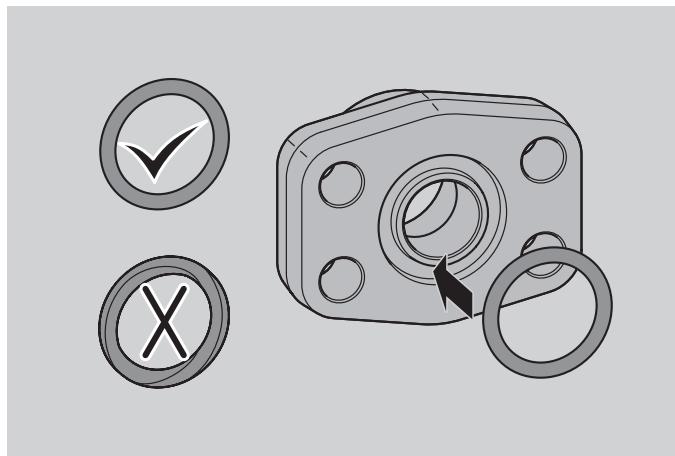

G

Scratches with a width greater than 0,13 mm (.0005 in) running perpendicular, radial, or spiral on the sealing surface or in the o-ring groove are not acceptable.

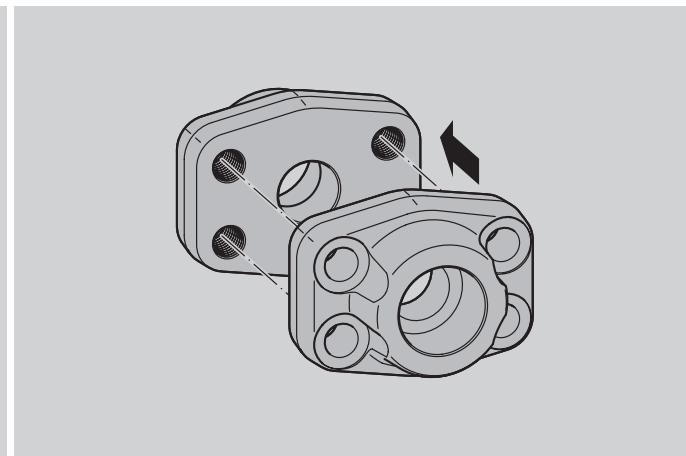

Lubricate the o-ring using the system fluid (or a compatible lubricant) and immediately proceed with the assembly in order to avoid exposure to contamination.

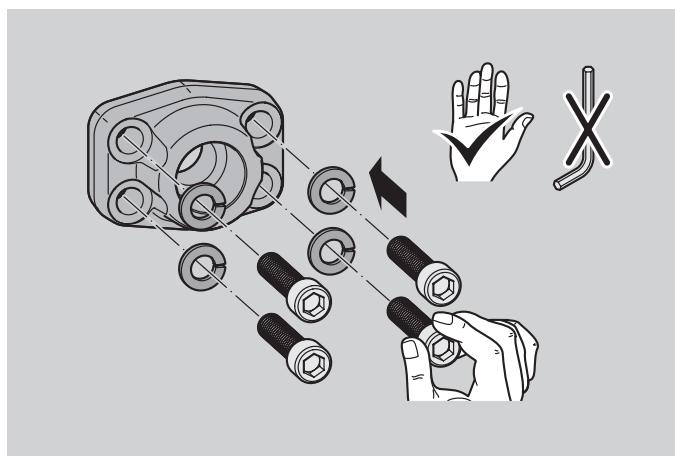

Do not use lubricating grease!

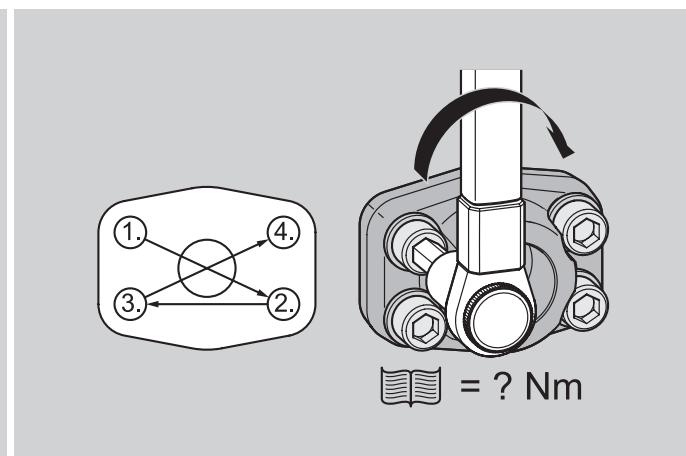

Place the o-ring into the o-ring groove, making sure that it is not twisted.

Position the flange against the mating component.

Place the socket head screws (with spring washers) into the flange and hand-tighten.

Finish the assembly by gradually tightening the socket head screws in small increments and in the displayed sequence to the appropriate torque level (see table on the right).

Property Classes of Bolts and Tightening Torques

Notes

¹ Not to be used for new designs.

Attention:

All bolts have to be pre-tightened before applying the full tightening torque to the bolts. Otherwise, the flange may break.

Please note that the tightening torques as stated on this page are only recommendations. These values correspond to oiled bolts with a friction coefficient of 0.17 and the material combination Steel/Steel.

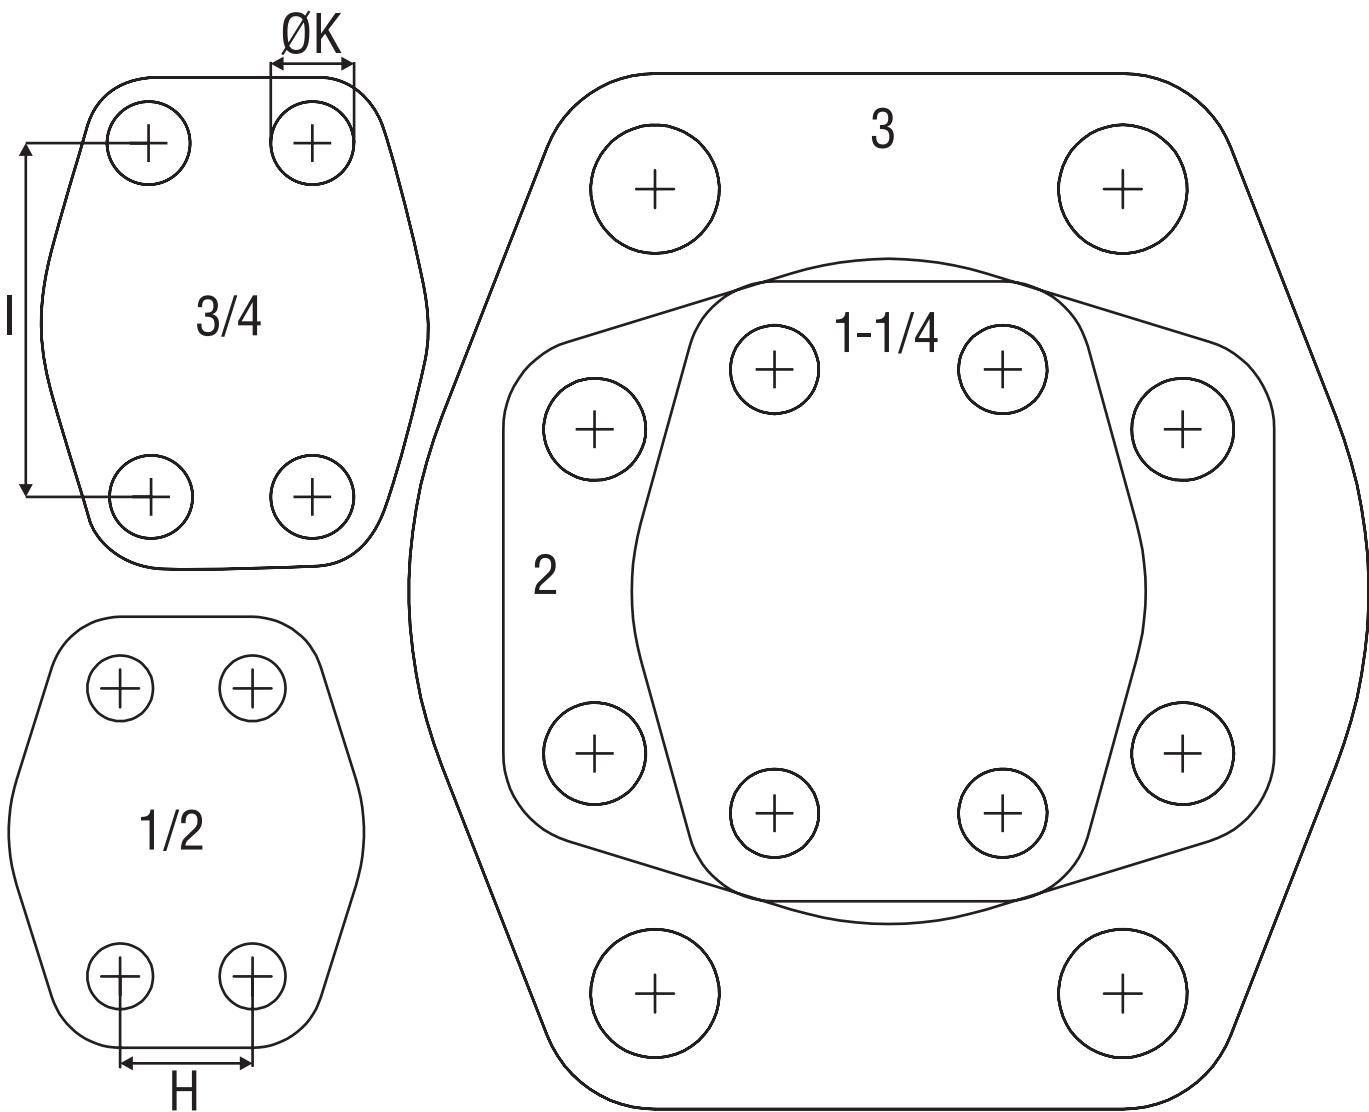

The exact tightening torques depend on factors like material, finishing, coating and lubrication of the components used, and have to be determined by the user himself.

Please contact STAUFF prior to the assembly for torque recommendations for alternative mating materials.

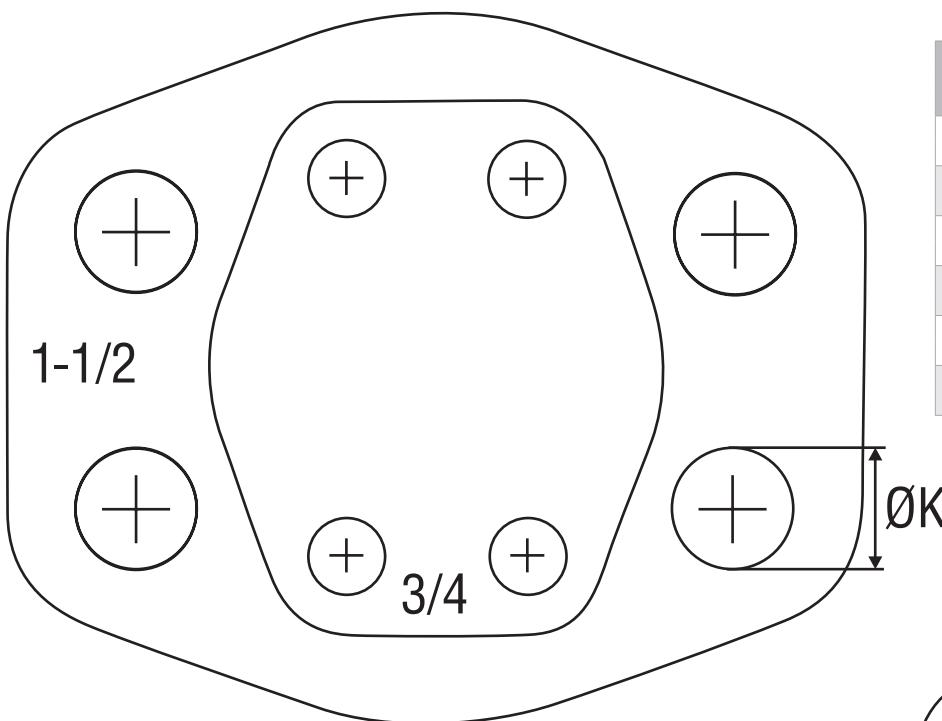

Sizing Guide for SAE Flanges 3000 PSI Standard Pressure Series

Nominal Size SAE	Dimensions (mm/in)			Metric Threads
	H	I	$\emptyset K$	
1/2	17,5 .69	38,1 1,50	8,7 .34	M8
	22,3 .88	47,6 1,87	1,5 .41	M10
