RELATIONSHIPS IN PRACTICE

PARKER HANNIFIN

Wilson's line sheet identifies Hydraulic, Pneumatic and Connector Technology Center relationships, connecting product access with technical expertise.

CLIPPARD

Wilson and Clippard developed a custom pneumatic manifold using miniature valves for a semiconductor application.

PROPORTION-AIR

Wilson integrated Proportion-Air pressure regulation into its IntelliTest hydrostatic testing system, demonstrating application-level collaboration.

A relationship-led business since 1965

Wilson emphasizes long-term relationships and supports customers through distribution, engineering, assembly, repair and training. Its history provides context; individual supplier start dates are not public information.

SCOPE & SOURCES

Publicly named manufacturers, not a verified internal vendor master. Supplier tenure, contract terms and performance data were not available. Names are normalized for readability; Parker divisions are grouped under Parker Hannifin.
