Subject: Compliance with AS9003: Inspection and Test Quality System

To Whom It May Concern,

This letter serves to confirm that **Wilson Company**, located at **4641 Ratliff Lane, Addison, TX 75001-3248**, operates a Quality Management System (QMS) that is fully compliant with the requirements of **AS9003: Inspection and Test Quality System**. Compliance has been verified through a structured internal audit conducted on **4/15/2024**, based on the principles of our existing **ISO 9001:2015-certified QMS**, which ensures adherence to customer, statutory, and regulatory requirements.

Our **ISO 9001:2015 certification (Cert No. C2023-01689)**, awarded by **Perry Johnson Registrars, Inc.**, remains valid through **4/4/2026**. This certification ensures that our QMS is effectively managed and that we continuously improve our processes, including those required by AS9003 for inspection and testing.

Our Approach to AS9003 Compliance:

1. **Inspection and Test Controls**
   As part of our QMS, we have implemented and maintain systematic inspection and testing procedures to ensure product conformity. These procedures are aligned with AS9003 requirements and are regularly reviewed and updated to ensure compliance. This includes inspections at key stages, from material receipt through final product release.
2. **Internal Auditing and Self-Assessment**
   Compliance with AS9003 was verified through an internal audit, which assessed our inspection and test controls, documentation practices, and nonconformance management. This audit confirmed that our processes meet the requirements of AS9003 and are supported by the continuous improvement framework outlined in ISO 9001:2015.
3. **Nonconformance and Corrective Actions**
   We maintain robust processes for managing nonconforming products and taking corrective actions. Our QMS ensures that all nonconformances are addressed in a timely manner, with root causes identified and preventive actions implemented to avoid recurrence. These activities are documented and reviewed to drive continuous improvement.

4. **Traceability and Documentation**
   Full traceability of materials and products is a key component of our compliance with AS9003. We maintain comprehensive records of all inspections, tests, and corrective actions, ensuring transparency and accountability in our production processes. These records are available for review as required.
5. **Continuous Improvement and Commitment to Quality**
   Our commitment to quality is reflected in our ongoing efforts to improve processes, products, and customer satisfaction. Our QMS ensures that feedback from internal audits, customer interactions, and nonconformance events are used to drive continual improvement, aligning with both AS9003 and ISO 9001:2015 requirements.

Conclusion:

We are committed to maintaining the highest levels of product quality and customer satisfaction by adhering to AS9003 and ISO 9001:2015 standards. Our internal audit has validated our compliance with AS9003, and we are confident in our ability to meet or exceed customer and regulatory expectations.

Should you require any further information or supporting documentation, please feel free to contact us at **(972) 931-8666** or **Quality@wilson-company.com**.

Thank you for your attention to this matter.

Sincerely,

Brian Teddlie
